#### TO OUR CUSTOMERS:

It is with great pleasure that we are sending to our eustomers this new eatalog, and we beg to tender thanks to old customers who have shown their approval of the quality of our seeds and our methods of serving them by repeated orders.

It shall always be our endeavor to supply you with only the very best seeds from European markets and our aim is to make prices as low as is possible with high grade quality.

It is not always possible to deliver seeds at a definite date owing to the fact that the crops depend very much on weather conditions. In such cases a delay of necessity must occur; however, all orders will be filled as quickly as possible. We guarantee our stock absolutely fresh and for this reason of superior germinating qualities.

Any seeds not listed in this catalog will be procured for you direct from European Seed Centers. The time required is usually from eight to ten weeks.

All prices in this catalog will be void with the issue of a new catalog.

With all thanks for past favors and soliciting your continued valued commands.

Yours very truly,

HERMANN GLIEME, Inc.

Hermann Glieme, Pres.

#### TERMS OF BUSINESS

#### PRICES

This list cancels all previous offers.

#### PAYMENT

We extend the usual terms of credit to regular customers and to parties known to us.

Unknown correspondents desiring to open an account will please furnish satisfactory references to parties in the trade with whom they have had credit relations, and sufficient time to make necessary investigation, otherwise cash must accompany order, if not, goods will be shipped C. O. D.

All accounts must be paid for by the first of the month following date of purchase.

#### POSTAGE-INSURANCE:

All seeds offered in this catalog will be delivered to your door postpaid.

We do not pay transportation charges on larger quantities to be shipped by express or freight.

All goods are offered subject to crop failures, shortages or other causes beyond our control and to being unsold on receipt of order.

HERMANN GLIEME, INC.

# **NOVELTIES AND SPECIALTIES FOR 1930**

## ACER (Japanese Maple seeds) Should be sown in spring immediately upon the arrival of the new crop. Be careful that the seed will

not dry out. Place your order early. Acer polymorphum atropurpureum. Blood-leaved Japanese Maple. This Maple 1 oz. 1/4 lb.

| is growing in the western sections near Kobe, and in the eastern very little. The seeds are carefully selected from the proven trees. It con- |        |         |         |

#### AZALEA AND RHODODENDRON

Experiments of B. Y. Morrison of the Bureau of Plant Industry in the growing of Azaleas and Rhododendrons from seeds having proved successful, details of the work and methods followed have been published by the U. S. Dept. of Agriculture in Circular 68-C, copies of which may be obtained without charge by florists and nurserymen who desire to make the attempt for themselves.

So generally considered difficult to start from seed that scientists in the Department had never experimented, the work was undertaken by Mr. Morrison under the stress of necessity when he found it essential that he secure a stock for breeding experiments.

Difficulty with these plants grows out of lack of understanding of the needs of the germinating and growing seedlings, it is explained by Mr. Morrison. Azaleas and Rhododendrons, as is commonly known, thrive only in acid soils. For his germination flats he mixed a soil composed of one-third sharp sand and two-thirds leaf soil, the latter made by rubbing half decayed leaves, gathered in local Oak woods, through a quarter-inch screen. In gathering the leaves, the uppermost layer of only slightly decayed leaves was discarded, as was the lower layer in which decay had gone so far as to destroy the vestiges of stems and leaf veins, only the intermediate layer being taken. With this light and friable compost, similar to the soil in which the plants grow in the woods, germination was satisfactory and this year's seeds are most desirable for planting early next Spring.

The circular consists of eight pages, giving details of the planting, culture and transplanting, and also the conditions of shade and moisture most conducive to satisfactory growth.

The new crop seed is expected to enter from Japan during March and April.

#### AGAVE

Agaves are essentially fanciers' or amateurs' plants. This noble group of plants has never received the attention it deserves, and yet no genus of plants in America furnishes so many suitable decorative plants. The Agaves are not at all difficult to grow. The soil should be principally loam and sandy, and if any vegetable soil be given it should be in small quantities. Good drainage and firm potting are necessary.

#### Exquisite Pink Improved.

A new strain true Exquisite Pink in color with a wonderful improved new form. An upright habit similar to our perennial Delphinum and best of all, this new improved strain comes practically 100% true. The color is a beautiful Soft Pink Shaded Salmon.

1/4 oz. \$ .50

1 oz. \$1.75 4 oz. \$6.00

#### Exquisite Rose

A beautiful shade of rose pink, several tones deeper than Exquisite Pink Improved but with the same new improved Delphinum form and coming quite true.

1/4 oz. \$ .50

1 oz. \$1.75 4 oz. \$6,00

#### LARKSPUR Emperor Brilliant Carmine

A delightful addition to this group, which grows only about twenty-four inches high. The color is identical to Lustrous Carmine in the Tall Branching group.

1/4 oz. \$ .50 1 oz. \$1.75

4 oz. \$6.00

#### LARKSPUR White Spire

A new dazzling pure white double Larkspur with the improved upright delphinum-like habit of Exquisite Pink Improved. This is a welcome addition to the new group of columnlike Larkspurs, as the long straight upright stem make it superior to all other white Larkspur as a cut flower.

LARKSPUR EXQUISITE PINK IMPROVED 1/40z. \$ .75

1 oz. \$2.50

4 oz. \$9.00

#### SAINT PAULIA (Usambara Violet)

Ionantha grandiflora. A very free and large flowering stove plant of grand effect, belonging to the Gesneriaceae and requiring about the same treatment. Very dwarf; leaves small, Gloxinia-like. Flowers beautifully dark blue, resembling those of a large-flowered sweet violet.

Trade packet \$1.50 5 Trade packets \$6.50

#### CALCEOLARIA Hybrida Grandiflora

Albert Kent Hybrids. A fine hybrid race of Calceolarias in a mixture contain- 1 Tr. Pkt. ing varied colorings and producing immense clusters of blooms; of compact growth. Highly recommendable. We shall be able to fill orders for next \$2.00 \$5.50

.

#### CINERARIA Hybr. Multiflora Nana "KENNERS IDEAL"

The plants of this new class are very dwarf and compact. Small leaves and a very large flower-head. High-

Ruth Fischer. Plant of compact, robust growth; flowers very large, true forgetme-not blue. Of exceptional value for pot culture and spring bedding.

#### PYRETHRUM Ptarmicaeflorum

A wonderful new species from the high mountains of the Canary Islands. Foliage is silvery-white and carried on long stems. Useful as hot-bedding and border plant. Will grow in any soil and best on places where the plants have always the full benefit of the sun. In the late fall cut the stems back and cover with peat, pine-needles or leaves, or winter the plants under glass. They will grow again early next spring. Highly recommendable for pot-plant and cut-flower growers.

#### TWO FINE FORCING CALENDULAS

Improved Sensation (Campfire). This Calendula is of vigorous growth, the flowers born on stout stems, needing little dis-budding. The blooms are of good form and are undoubtedly larger than those of any previously introduced. The color of the petals is brilliant orange, with searlet sheen and a full yellow center.

1/4 oz. \$1.00 1/2 oz. \$2.00 1 oz. \$3.00

Radio (New). This is a variety entirely new in Calendula. There have been many new Calendulas introduced during the past few years, but there has not been a distinct break in the formation of the flower. The flowers are globular in shape, with beautifully quilled petals. The color is a warm, deep yellow.

1/4 oz. \$1.00 1/2 oz. \$2.00 1 oz. \$3.00

Streptocarpus Hybridus

Beautiful new large flowered hybrids. Pretty colors such as Pink, Blue and White. Streptocarpus are as easily raised from seed as Primulas or Cinerarias, and sown in January or February they bloom freely the following summer and autumn.

1/128oz. \$1.50 1/64oz. \$3.00 1/32oz. \$6.00

#### PANSY

#### Glieme's World Giant Mixture

An extra early giant strain, in bloom about the same time as the Ice Pansies. The finest strain we know of—the richest, most brilliant, most unusual new colors. Enormous sized flowers which are carried on strong stems. Absolutely in a class by itself.

SWEET PEA-MRS, HERBERT HOOVER "The California Blue"

This variety easily leads the way in "blues" of the Early Winter Flowering type. It is even better than the popular Blue Bird, as it combines great length of stem and vigorous growth with a true blue color. Mrs. Herbert Hoover is a uniform blue shade, thus a great improvement over all other blue varieties. The color is bright and clear, and will, therefore, be much appreciated by all growers. It was awarded the Gold Medal, two Silver Medals, and a Certificate of Merit. 1/oz. \$1.25 1 oz. \$2.25

#### BLUE BONNET

Manuve. An extra large, fine deep blue. The color is evenly distributed, with not the slightest trace of manuve. By careful comparison the Color and Vigor of BLUE BONNET is far superior to any other blue on the market. It has very long stems with four bluesoms to a stem.  $1_{1/0}oz.~\$1.25 \qquad 1~oz.~\$2.25 \qquad 4~oz.~\$7.50$ 

#### SWEET PEA "BURPEE'S LAVENDER"

Vigor of growth, length of stem, size of flower, and purity of color are well combined in this Early Flowering sterling novelty. Burpee's Lavender is outstanding in its color class. It is a lovely light Wisteria-lavender, a color that appeals because of its rich yet soft tone. The strong growth, charming colo., and bold size of the flowers make it a foremost variety for cutting.

1/20z. \$1.25 1 oz. \$2.25 4 oz. \$7.50

#### MAJESTIC ROSE

Majestic Rose. An immense, deep brilliant rose pink of the popular color of Zvolanek's Rose, but of a richer, deep tone. The color in MAJFSTIC ROSE is more evenly diffused than in any other Sweet Pea in this color class and lacks the white at the base of the standard and wings which others of this color have. This improvement in color gives it a brilliance which is quite new. In Vigor of Growth, Length of Stem, Size of Bloom, MAJESTIC ROSE excells all other early Sweet Peas.

1/2 cz. \$1.25 1 oz. \$2.25

#### SWEET PEA "VALENCIA"

A bright orange sunproof, of slightly softer tone than Orange King but having what all other orange Sweet Peas lack. Immense Vigor in growth length of stem and size of blooms. Where other orange Sweet Peas throw only two and three blooms to a spray, VALENCIA throws three or four.

1/2 oz. \$1.25 1 oz. \$2.25 4 oz. \$7.50

#### VERBENA DWARF COMPACTA FIREBALL

A dwarf compact Verbena about six inches high literally covered with bright scarlet flowers, excellent for borders, beds, or pot plants and comes absolutely true from seed.

1/8 oz. \$ .75 1/4 oz. \$1.50 1 oz. \$5.00

#### VERBENA HYBRIDA GRANDIFLORA ROYALE

This is a Verbena of enormous size, the individual florets measuring over an inch and a quarter in diameter. The color of this new variety is a rich deep royal blue with a large creamy yellow eye. A wonderful acquisition to our group of Grandillora (Marmoth) Verbenas.

1/8 oz. \$ .50 1/4 oz. \$1.00 1 oz. \$3.50

#### VERBENA HYBRIDA GRANDIFLORA ETNA

Large trusses of intense Paul Crampbell Geranium red with a small creamy yellow eye. The individual florets are over one inch in diameter.

#### VIOLA CORNUTA

**G.** Wermig. Extra early and exceedingly free-flowering, dark blue. 1/32oz \$ .80  $\frac{1}{16}$ oz. \$1.60  $\frac{1}{4}$ oz. \$6.00

Hansa. Deep blue, free and long flowering.

1/32oz. \$ .75 1coz. \$1.50 14oz. \$5.00

W. H. Woodgate. A great improvement on the well-known G. Wermig. Very rich and perpetual flowering Pretty dark blue flowers. Highly recommendable for cut and bedding purposes. The latest and best in Violas.

1/32oz, \$ .90 \(\frac{1}{16}\) oz. \$1.80 \(\frac{1}{4}\) oz. \$6.50

# FERN SPORES

#### Tender Varieties

Spores will do about equally well in pots or pans, which should be supplied with coal cinders for drainage. Soil for sowing spores on is best composed of five parts, in the proportions of two parts good garden soil, two parts of finely screened peat and one of sharp clean propagating sand. Leaf-mold may be used instead of peat, if easier to procure. This soil should be thoroughly sterilized. Make soil level, firmly pressed and thoroughly watered with sterilized water. Three or four hours after watering will be the best time to sow spores. Do not cover spores with soil. The spore- pots or pans should be kept tightly covered. A temperature of 65° F, should be maintained in the propagating house.

Finest mixed

This is considered the grandest aster ever introduced. Plant tall-growing branching like the Globe Aster and bearing on very long salks flowers of mammoth size. The flowers, which may be cut with stalks of from 1½ to 2 feet in length, measure up to 8 inches across, being densely double, fine curled and bearing the greatest resemblance to a large-flowered Japanese Chrysanthemum. Unequalled as a cut flower and highly effective for tall beds and groups. 1/40Z. 1 oz. White Light Salmon Rose Light Blue Dark Blue Brilliant Rose Crimson Lilac Crownprince (glowing carmine) ...... \$ .40 \$ .80 \$3.00 3.00 Finest mixed ...... Improved Giant California Aster. #### BEGONIA SEMPERFLORENS

Begonia Froebelli

We have always made a specialty of Begonia seeds, and have always been intent on securing the best the market affords. We wish to call attention to Begonia Glory of Erfurt Fire Sea, Zauberin, Broadcast and Rosabella.

We introduced these varieties a few years ago, and they still maintain their position as five of the very best varieties.

The best time for sowing Begonia seeds is from October to January in order to have flowering plants during the entire year. These plants always find willing buyers as they can be used for pot plants as well as for outdoor purposes.

#### BEGONIA SEMPERFLORENS

#### THE CULTURE OF THE SEMPERFLORENS

Sow the very fine seed equally and thinly into boxes, filled with solely old settled mold. The best soil is 7/8 mold mixed with 1/8 of fine sand. Before sowing the soil in the boxes must be well moistened and equally pressed. Cover the boxes with glass and spread paper over the glass. A temperature of 65 is advisable. Generally it takes about 14 days until the seeds begin to germinate. The young seedlings should be moistened moderately only. The first transplanting takes place as soon as possible. In order to further the growth it is recommendable to transplant the seedlings often into new and nutritious soil.

1/32 oz. of seed will yield about 30,000 seedlings.

#### BEGONIA SEMPERFLORENS BROADCAST

This Begonia is a worthy companion to the Glory of Erfurt, introduced a few years ago. These plants will grow to a height of 12 inches, branch out considerable and are profuse bloomers. The blooms grow above the dark green foliage in large clusters. Thir color is a clear brilliant red. We wish to state especially that the seed of this Begonia is obtained by crossing certain other varieties and for this reason will always make plants absolutely true to color and the color an

1/128 oz. \$1.50, 1/64 oz. \$3.00, 1/32 oz. \$6.00

#### BEGONIA SEMPERFLORENS ZAUBERIN

This Begonia belongs to the dwarf varieties and is a profuse bloomer, producing an abundance of brilliant pink colored blooms. These plants attain a height of about six inches and grow into a bushy, round-shaped plant.

The extremely large flowers are earried umbrella-like above the dainty reddish foliage which is almost covered up by the flowers. The round and brilliantly pink blooms of about 2 inch diameter remind one of the Lorraine Begonia. In all our experience covering many years we have never seen a variety that gave promise of conquering the American market.

"Zauberin" is a sport of "Fire Sea" a variety introduced by us four years ago and which was a great success. There is no doubt that "Zauberin" will be an even greater success.

1/128 oz. \$2.00, 1/64 oz. \$4.00, 1/32 oz. \$8.00

## BEGONIA SEMPERFLORENS ROSABELLA

Begonia Semperfl. Rosabella

Among the large assortment of Begonia Semperflorens there has been lacking up to the present time a really low growing pink variety like compacta Rosea, Berta Bofiinger, Delicacta, Dornroschen. These varieties run very uneven in height and color and their flowers are rather small. After attempts at hybridizing, extending well over twelvears, a variety fast obtained that will always bloom true to name. Rosabella will attain a height of about six inches, will branch out and grow very symmetrical. It blooms profusely and the flowers are of very large size. The color of the blooms is a clear brilliant light pink. Besides border work it will be in demand for pot plants as they are perfect substitutes for Lorraine Begonias.

#### CACTUS

Sow in March, April or May as later sowings generally prove less advantageous and frequently cause great losses in winter.

Use shallow pans about 2 inches high and 5 to 6 inches in diameter. The bottom of these pans is filled with crocks to 13 its height and the other 2[3 with a mixture of soil consisting of good peat, leaf-mould and sand. With a flat piece of wood the soil is made level with the top of the pan and the seed sown evenly divided. The seed is then very moderately covered with the same mixture of soil, finely sifted. The seeds are now gently pressed in with a round piece of wood leaving room between the soil and rim of pan of about 1|4 inch. The soil may now be properly watered with a fine hose. Moistening may also be done by putting the pan into water, to half of its height, until the surface begins to get damp. The pans are then placed in frames with bottom heat of about 65 to 75 degrees and covered up to their rims with cocoanut fibre. The frame must be pretty airtight, and shaded with paper or other tin material against hot sunshine preventing the soil from drying too fast. Dry pans must be watered every day. Some varieties germinate within a few days, while others require longer, sometimes several months. Mamillarias and Echinocacti germinate quickest, whereas the Cereus, Pilocereus and Opuntia varieties require a longer time. It is essential and very important that all seeds are kept in an even temperature and even dampness, for they will then germinate best and easiest.

#### CINERARIA MULTIFLORA NANA

For commercial purposes the Cineraria Multiflora Nana ranks among the best. The blossoms are about an inch in diameter, and extend in large dense umbels above the delicate foliage. The plant grows very compact and for this reason requires much less space than other Cineraria plants.

The plant is not affected by rot of some of its leaves nor by damage done by snails because these leaves are replaced by new shoots without deforming the plant.

Cineraria Multiflora Nana plants reach a height of ten inches, and are considered one of the best pot plants in the market today.

If sown early enough they will bloom for Christmas, but the plants will be at their best bettween March and May.

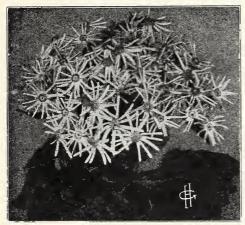

# CINERARIA HYBRIDA GRANDIFLORA MAXIMA

This plant attains a medium height. The large flowers in ten to twelve-inch umbels extend well over the foliage. The leaves are larger than those of Multiflora Nana, and for this reason Maxima is a more decorative plant.

 $\label{eq:continuous} \mbox{It finds a very ready market for Mother's Day} \mbox{ sales.}$

#### CYCLAMEN SEED

The famous "BINNEWIES" "STOLDT" and other German Strains.

The seed we offer is selected only from specimen plants which are true to type and color.

The quotations given below will be found to be reasonable for high quality seed.

We call particular attention to the latest Cyclamen introductions, namely: "Golden Salmon," "Silver Salmon," "Saffron Red," and "Flame."

PANSY Giant Triumph

These plants distinguish themselves by a strong growth forming compact bushes of round shape and conspicuous large foliage. Upon strong stems the five spotted petals of a completely round form elevate them selves above the foliage with an erect posture in a graceful manner. The extremely broad petals overlap in a manner giving the flower almost the appearance of being twofold. The edge of the petals of most of the flowers is neatly curled without injuring the erect posture of the flower.

The magnificence, the luster and the richness of the colors is very conspicuous, caused by the unique and very dark red and brown tone of colors. Upon each petal of the flower appears prominently the large extremely effective dark colored spot which is oftentimes surrounded by a conspicuously glowing variously colored boxed boxed.

ored border.

Charm of March, velvety dark blue

#### EXPOSITION PHANTASY HIMALAYA (Ice Pansy)

(Winter-Blooming Giant Pansy)

The main advantage of these Pansies over all hitherto existing ones is the extreme earliness of flowering, in connection with an unusual hardiness. In Central Germany they begin to flower in February already, even beneath the snow, are in full bloom the first part of March, at a period, where all other sorts of Pansies begin to bud only, and continue to flower until the summer.

The flowers are very large, well formed and fragrant. This new class of Pansies is deserving of the strongest recommendation for bedding and cutting.

#### PETUNIA hybrida grandiflora fimbriata "THEODOSIA"

1/128oz, 1/64oz. 1/32oz. Ruffled bright pink flowers with golden throat . \$1.75 \$3.50 \$6.00

#### PETUNIA GRANDIFLORA NANA

(Large flowering dwarf Petunias)
Since our dwarf Petunias have enjoyed a large demand for them for years we have deemed it advisable to introduce a low growing, large flowered Petunia of excellent qualities. The plant will attain a height of only 8 to 9 inches, branch out considerable but will grow in close formation making unnecessary to tie them The pretty round bushes carry their flowers well above the foliage. Their colors are white and dark purple mixed in beautiful combinations. They are suited especially for pot plant purposes or can be used in flower

Trade packet, \$2.00 Five trade packets, \$8.00

#### DOUBLE FLOWERING PETUNIAS

As the seed of the double varieties is obtained by hybridization, it will not produce all double flowers, but the singles will be unusually fine. The weaker seedlings should receive great care, as they produce the finest double flowers.

#### STOCKS

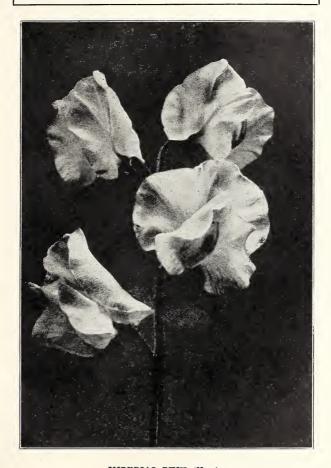

Our collection of Stocks is made up of the finest and choicest varieties in existence. The seeds we offer are hand picked from plants carefully grown in pots, and will produce a high percentage of doubles.

Stocks are one of our Principal Specialties.

#### WALLFLOWER (Goldlack)

#### Double Fruehwunder (Latest Novelty)

#### (Early Wonder)

Planted in January or February, these plants will bloom in June, planted in March they will bloom in July, etc. Thus, it will be seen that it is possible to have blooming plants during the entire year. It is to the best advantage to sow in June, July, August and September in order to have blooming plants outside in the fall or in the cool houses in winter or spring. Fruchwunder will grow to a height of 30 inches. It will branch out, these branches also being laden with beautiful flowers which are well suited for cut flower purposes during the cool season.

### PERENNIAL - FLOWER - SEEDS

Early in May is the ideal time to begin to sow seeds of rockery plants and indeed all the hardy herbaceous sorts. Sow the seeds as evenly as possible, choosing, if possible, a day when there is not much wind. If the soil is not very fine it may be lightly tamped before the seed is sown. The covering of these seeds is a most important step; it is much easier to fail through giving too much covering than too little. Very fine seeds such as Campanulas need very little covering at all. Larger sorts such as Iberis, cover just out of sight, or with about one-eighth of an inch of very fine soil. There are some sorts of Perrennial seed, which will not germinate until about 6 months or even the following spring (for instance Helleborus, Paonia, Phlox, Trollius,

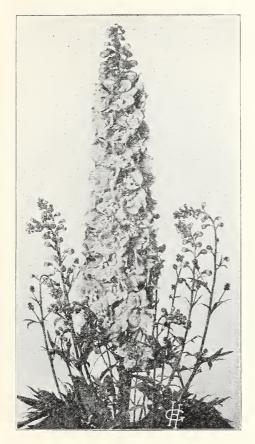

We believe it is a good plan to sow the seed as soon as it arrives, even if this is midwinter. The action of the frost on many species seems to help germinate.

PEPPER (continued)

| THIT HIS (CONTINUES)   | ½ oz.  | 1 oz.   | 4 ozs.  |
|--|--------|---------|---------|
| Early Dwarf Red Squash   | \$ .25 | \$ .50  | \$1.50  |
| A medium sized flat, or tomato-shaped variety with pendent fruit more or   |        |         |         |
| less ribbed, about 2 inches in diameter and one inch in depth; flesh thick   |        |         |         |
| and mild; color bright red.  |        |         |         |
| Harris' Earliest   | .40    | .70     | 2.00    |
| The earliest pepper we are acquainted with, being earlier than Neapolitan.   | .25    | .50     | 1.50    |
| A very early and productive large variety and one of the sweetest and most   | .20    | .50     | 1.50    |
| mild. Fruit of upright growth, four inches long and two inches thick, bright   |        |         |         |
| red.   |        |         |         |
| Red Chili  | .25    | .50     | 1.50    |
| Of low growth, forming a spreading plant about 18 inches high; fruit usually   |        |         |         |
| erect, about one and a half inches long, cone shaped, bright red and very  |        |         |         |
| hot; exceedingly prolific; used for pepper sauce.  Sweet Mountain, or Mammoth  | 07     |         |         |
| Similar to Bull Nose, but more elongated; pendent fruits often grow six  | .25    | .40     | 1.35    |
| inches long by four inches in diameter; bright red, mild sweet.  |        |         |         |
| Oshkosh  | .60    | 1.00    | 3.00    |
| A very distinct, desirable, large variety. While the fruit is bright canary  | 100    | 1.00    | 0.00    |
| yellow at maturity, during growth it is an intense, deep glossy green, mak-  |        |         |         |
| ing an attractive sort to market as "green peppers."   |        |         |         |
| RADISH   | 1 oz.  | ½ lb.   | 1 lb.   |
| Express, round shaped, earliest, bright searlet  | \$ .15 | \$ .60  | \$1.00  |
| Non Plus Ultra, or Fireball (Searlet Button)   | .20    | .65     | 1.10    |
| Round rather than turnip-shaped, of medium size with a moderate top; bright scarlet; very early, and one of the best forcing varieties, following Saxa |        |         |         |
| in three to four days.   |        |         |         |
| Erfurt Scarlet Turnip, short leaved, extra for forcing   | .15    | .60     | 1.00    |
| Icicle, long, white, cylindric, new. The flesh is crisp and tender even when   |        |         |         |
| fully developed and has an agreeable snappy flavor. Recommended for  | 20     | 25      | * * 0   |
| either spring or fall sowing   | .20    | .65     | 1.10    |
| Wurzburg Giant (Crimson Giant), turnip-shaped, extra large, deep crimson, thin, tender skin. Intermediate in season                                    | .15    | .60     | 1.00    |
| Saxa   | .15    | .60     | 1.00    |
| The earliest of the forcing radishes, and one of the slowest to shoot to seed.   |        |         |         |
| Round, bright scarlet and with the smallest possible top.  |        |         |         |
| SUMMER RADISHES  |        |         |         |
| Large White Summer Salvator, round; large size; skin and flesh pure white, crisp   |        |         |         |
| and fine. An excellent summer sort   | .15    | .60     | 1.00    |
| FALL OR WINTER RADISHES  |        | co      | 1.00    |
| Long Black Spanish   | .15    | .60     | 1.00    |
| long, 2 to 3 inches in diameter and nearly black in color.   |        |         |         |
| Long White Spanish   | .15    | .60     | 1.00    |
| Quite like Long Black Spanish except in color and being less pungent.  |        |         | 2100    |
| Round Black Spanish  | .20    | .65     | 1.10    |
| Roots are round, inclined to top-shape, and 3 to 4 inches in diameter; skin  |        |         |         |
| almost black, flesh white, crisp and pungent.  |        |         |         |
| (\$8.00 per 10 lbs. all varieties)   |        |         |         |

## ORIGINAL S. KUNDE & SOHN

DRESDEN, GERMANY

### Florist Knives

## Nursery Knives

### and Shears

KUNDE Knives and Shears are hand forged from the finest steel and are guaranteed as near PER-FECT as tools can be made.

The Knives are known the world over for the wonderful edge they hold-due to the hardiness of the steel and tempering, the correct bevel, ebonite or full shaped wood handles, large brass rivets, and extra heavy brass linings.

In Shears Kunde originated the double-cut principle; the cut coming from both sides is easier and does not require finishing with a knife for proper healing. The large bolt with security plate and the method of closure which does not allow pinching of the hand, are also distinctive features.

You will find these knives and shears to be most satisfactory not only for the way they do their work, but for the way they hold their cutting edges and their long life in continued service.

#### SHARPENING OF KNIVES

We recommend a Belgian Oil Stone. Whet circularly towards the edge with the blade flat and maintaining a pressure on the edge without lifting the back. Continue repeatedly on both sides until particles of steel appear on the edge. Remove these by drawing diagonally across the stone very lightly, lifting a little the back of the blade,

### BUDDING KNIVES

No. 351. For trees and roses, 8 cm., \$1.50 ea.

No. 41H. A finely polished budding knife of buffalo horn and brass lining, 101/2 cm., \$2.50 ea.
